ACCESSORIES FOR TWO-WAY RADIOS

PRYME®

PRYME®

Radio accessories made right.
Service made easy.

Discover what PRYME® has to offer with our award-winning product line.

Our product line serves many markets including public safety, police, fire, emergency services, healthcare, security, oil & gas, tactical and hazmat professionals, as well as industrial, commercial, hospitality and entertainment markets.

Many companies copy and import products similar to ours, but at PRYME, we control the design and manufacture of everything we sell. At PRYME, we INVENT, DESIGN and BUILD the finest professional grade accessories for 2-way radios.

We are committed to providing you with the highest level of customer service, which includes free freight on qualifying orders, personalized customer service representatives who are available M-F, 7AM-5PM PST, a money-back guarantee, and automatic replacement of parts with warranty. We promise you will receive the highest value for your radio accessory purchase.

Our customers deserve the best, and we will make sure you are always number one.

2012 is going to be an exciting year for PRYME's customers!

We have transformed our product portfolio, taking requests from customers, and feedback we received while studying the real-world application of our audio accessories. In response, we have upgraded existing products to incorporate many new features and to increase performance. Plus, we have added new products to fill niches that were not being adequately served. The results are clear - this is our best line of products ever.

PRYME is able to make such broad upgrades to our product lineup because we control the design of manufacture of everything we sell. Other companies may copy designs, and import products similar to ours, but no other audio accessory company in the two-way radio industry can claim to have the same kind of input into the product development process that we have.

Just about every product in our portfolio has received an upgrade. These changes range from the small but meaningful, to giving some products a major performance overhaul. From big to small, the net result is that our audio accessories perform better and are a better value for your communications dollars.

HYDRA™ (Patent Pending) Radio Connectors

Available on select radio connector models, our new molded HYDRA™ connectors provide the very best resistance to the elements. Because the wires and electronic components inside of the connector are sealed beneath the hardened thermoplastic shell, the connector is completely waterproof and can be fully immersed, another industry first for PRYME!

- HYDRA™ - a fully molded, waterproof radio connector
- Flexible, Thermoplastic outer-shell is strong and extremely durable
- The radio-side of the connector is rubberized to prevent the connector from rubbing or slipping
- Large, knurled thumbscrew which is completely retained and cannot be lost
- Heavy duty, spring loaded contact pins - gold plated
- Slimmer profile compared to most OEM radio connectors
- Available on select (multi-pin) radio connector products only

HYDRA™

**Fully sealed.
Watertight!**

RINO™ Super Rugged Cables

PRYME introduces our most durable microphone cable ever. The new RINO™ cable is a rugged, military-grade cable that is engineered to last longer and retain its original shape better than our previous cable. With a tough polymer jacket on the outside and Kevlar® reinforcement inside, this cable extends the lifespan of our audio accessories.

- Industrial grade microphone cable FIVE TIMES more robust than our previous cable!
- More immune to stretching -- coiled cable always returns to its original shape
- Cut and tear-resistant polymer jacket material
- Kevlar® reinforced for additional durability
- Individual conductors are made of flexible stranded copper wire
- Ample strain-relief reduces wear at the cable joints
- Lifetime limited warranty

RINO™

Kevlar® (DuPont Corp.)

Kevlar® is a registered trademark of DuPont.

STORM TROOPER™ (SPM-4200 Series) HD Public-Safety Grade Speaker Microphone (pg. 21)

The STORM TROOPER™ SPM-4200 is a heavy duty remote speaker microphone, specifically built for public safety use. Engineered to high standards of performance and durability, the STORM TROOPER™ features a noise canceling microphone, high output front-firing speaker, and a HI/LOW switch so that you can easily toggle the volume of received calls.

- Large speaker microphone
- Front-firing, high-volume speaker
- HI/LOW volume toggle switch
- Rugged, heavy-duty design specifically built for public safety usage
- Fully submersible - meets IP 67 standards!
- Large tactile switch PTT is easy to use even while wearing gloves
- Earphone jack for optional listen-only earphone (sold separately)
- Panic switch included for some models (radio must support external panic)

STORM TROOPER

TROOPER II™ (SPM-2200 Series) Weatherized Speaker Microphone (pg. 22)

The SPM-2200 TROOPER II™ is an upgraded and weatherized version of our TROOPER® series speaker microphone, the best-selling PRYME speaker microphone product of all time. The TROOPER II™ is better sealed to prevent dust and moisture from entering the microphone.

- A weatherized version of our TROOPER® speaker microphone
- IP56 rating – sealed against dust and liquid (Now including radio cable)
- Earphone jack faces down to prevent rain from entering
- Large PTT button is easy to operate even when wearing gloves in cold weather
- Rugged strain-relief is sealed to prevent fluid entry
- Noise canceling microphone

TROOPER II™

SILHOUETTE™ (SMC-1LW Series) Microphone (pg. 25)

Designed with retail, hospitality, and healthcare users in mind, our SMC-1LW SILHOUETTE™ is our smallest, lightest speaker microphone yet. The SILHOUETTE™ is as discrete and unobtrusive as it is easy to use. Despite its small size, the front-firing high-output speaker is just as loud and easy to hear as a speaker microphone twice the size.

- Small, lightweight and easy to use - measures only 2.8" x 1.9" x 0.85" (1.4" clip) (H/W/D) and weighs 2.6 oz.
- Adjustable, rotating clip secures the microphone gently to the user's clothing
- Loud front-firing speaker matches the audio output of much larger speaker mics
- Tactile Push-To-Talk button for sending radio calls
- Microphone allows user's voice to be heard clearly
- Earphone jack (3.5mm)

SILHOUETTE™

HDS-BT Dual Muff Bluetooth Headset (pgs. 13 & 49)

PRYME's popular dual earmuff headset is now available in a wireless Bluetooth version. The HDS-BT uses the same design as our other HDS earmuff headsets but can connect wirelessly with a Bluetooth enabled cellular phone or a PRYMEBLU Adapter (sold separately) for two-way radio use.

- The same dual muff headset design as our popular wired models – now available in wireless Bluetooth
- Connects to any Bluetooth capable cellular phone or to a PRYMEBLU® Adapter for two-way radio use (PRYMEBLU® Adapter sold separately)
- Push-to-Talk button on left muff allows you to activate PTT wirelessly (when used with a PRYMEBLU® Adapter)
- Noise canceling dynamic microphone element for clear audio even in noisy environments
- Dual muff earphones - seal out ambient sound so you can hear incoming transmissions
- ON/OFF – volume control knob on headset
- Internal lithium-ion (Li-Ion) rechargeable battery for up to 12-hours of operation between charges
- Comfortable behind-the-head band design allows the headset to be worn for hours
The over-the-head Velcro® strap holds the headset in place
- Fully adjustable chrome-plated boom
- Available in flat black (HDS-BT-EMB) and carbon fiber (HDS-BT-EMC) finishes
- Wired jack allows for headset to be connected to a two-way radio without using Bluetooth (cable sold separately)

Use it with your cell phone!

DEFENDER™ (SPM-1200C Series) HD Public-Safety Grade Speaker Microphone (pg. 39)

The Defender™ C-Hook SPM-1200C is adjustable for extra comfort.

- Rugged lapel mic with surveillance style C-Loop earphone can be worn on either ear
- The C-Ring is a secure yet comfortable style earpiece that provides outstanding receive audio
- The patented swivel earpiece design allows for longer lasting strain relief
- High-quality electret condenser mic element produces excellent transmit audio
- Rugged, polycarbonate housing allows for maximum durability
- A large, metal clip secures the mic/PTT element to the user's lapel or collar
- Conveniently located PTT button for easy use
- Features Dual Switch Technology (DST) for maximum PTT durability

LMC-1GH SERIES (pg. 45)

Using our 22+ years of product development experience, we have created a brand new line of products specifically designed for our more cost sensitive customers. Great for hospitality, healthcare, sporting, recreation and similar applications, the LMC Series delivers great performance at a fraction of the cost of other models.

- Comfortable G-Hook style earpiece can be used on either left or right ear
- Large speaker delivers clear, crisp audio
- Speaker can be easily cleaned for comfort or hygiene
- Clip-on microphone unit includes PTT and stainless steel clip that rotates 360° for easy use
- Straight cables are very flexible and easy to use
- Molded strain reliefs help protect cables from excessive bending and pulling
- High quality speaker microphone delivers loud, crisp audio

P-CASE-03B	Silicone case for Motorola CP200 Radios - Black	\$19.95
P-CASE-03S	Silicone case for Motorola CP200 Radios - Safety Orange	\$19.95

More cases available soon.

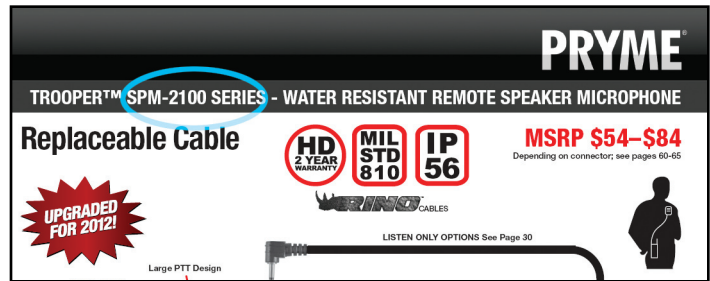

HOW TO ORDER

Ordering is Easy!

Placing an order for a PRYME audio accessory is simple! You just need to know two pieces of information: the product Series Number of the PRYME accessory you wish to order and the PRYME Connector Number that fits the two-way radio that the accessory will be used with. Together these two pieces of information will allow you determine the Model Number of the accessory.

Step 1: Determine Series Number

To determine the product Series Number, simply consult whatever page of the catalog that the accessory you wish to order is located on. Each product is identified by Series Number and sometimes also by a Series Name. The Series Number and Name (if there is one) is located inside a gray box at the top of the product's catalog page. For example, the Series Number for the Trooper speaker microphone product shown on page 23 of this catalog is SPM-2100.

Step 2: Determine Connector Number

To find the PRYME Connector Number you will need to know the manufacturer and model number of the radio that the accessory will be used with. You can then consult the connector chart which begins on page 64 of this catalog. Simply locate the listing on the chart which shows the radio manufacturer and model number. The connector which fits the radio will be shown on the right hand side. For example, if you are using a Kenwood TK-2160 radio, the chart on page 67 indicates that the correct connector number is the X01 connector.

PRYME CONNECTORS				
MANUFACTURER	RADIO MODELS	ADAPTER	STYLE	CONNECTOR
KENWOOD	TH-22AT, TH-235A, TH-28A, TH-42AT, TH-48A, TH-77A, TH-78A, TH-D7A(G), TH-F6, TH-F6A, TH-G71A, TH-K2AT, TK-208, TK-2100, TK-2102, TK-2130, TK-2160, TK-2170, TK-220, TK-2200, TK-2200LP, TK-2212L, TK-2302VK, TK-240, TK-240D, TK-248, TK-250, TK-260, TK-260D, TK-260G, TK-270, TK-270G, TK-272G, TK-308, TK-3100, TK-3101, TK-3102, TK-3130, TK-3131, TK-3160, TK-3170, TK-3173, TK-320, TK-3200, TK-3200LP, TK-3212L, TK-3230, TK-3230VLS, TK-3302UK, TK-340, TK-340D, TK-348, TK-350, TK-352, TK-360, TK-360S, TK-370, TK-370S, TK-372G, TK-373, TK-430, TK-431, TK-2312, TK-3312		TWO-PIN	X01
	NX-200, NX-300, TK-190, TK-2140, TK-2180, TK-280, TK-290, TK-3140, TK-3448, TK-3180, TK-380, TK-385, TK-390, TK-480, TK-481, TK-5210, TK-5220, TK-5310, TK-5320, TK-5400	PRYME PA-M111 or Kenwood KCT-30	MULTI-PIN	
KENWOOD	NX-200, NX-300, TK-190, TK-2140, TK-2180, TK-280, TK-290, TK-3140, TK-3448, TK-3180, TK-380, TK-385, TK-390, TK-480, TK-481, TK-5210, TK-5220, TK-5310, TK-5320, TK-5400		MULTI-PIN	X11

Note that some radio models may be listed on the connector chart more than once. Generally, this is because PRYME offers two or three different connectors which will fit the radio: one connector that fits the radio directly and another connector (or two) that require an adapter (sold separately) in order to fit the radio. For example, the Motorola XTS5000 radio is listed twice on page 68 of the connector chart. The X23 connector fits the radio directly with no adapter, while the X13 connector fits the radio if you are using a Motorola BDN6676 or PRYME PA-BDN6676 adapter. If your radio model is listed more than once, you must chose whether you would prefer the stand alone [connector] or [connector]+[adapter] configuration. Adapters are sold separately.

MOTOROLA	EX500, EX600, EX600VLS, GL2000, GP328 PLUS, GP338 PLUS, GP344, GP388, PRO5151 Elite, EX560		MULTI-PIN	X43

If your two-way radio model isn't listed on the connector chart, you can contact PRYME directly for additional assistance.

Step 3: Determine Model Number

Now that you have determined the Series Number and Connector Number of the accessory you wish to order, you can determine the Model Number of the accessory by combining them.

If the Connector Number begins with an X, replace the two trailing zeroes in the product Series Number with the two numeric digits of the connector number. Example: for a SPM-2100 series speaker microphone using an X23 connector, the model number would be SPM-2123. If the Connector Number begins with an N or an M, insert the entire connector number in place of the two trailing zeroes in the product Series Number. Example: for a BT-500 series Bluetooth adapter with a M33 connector, the model number would be BT-5M33.

Step 4: Determine Pricing

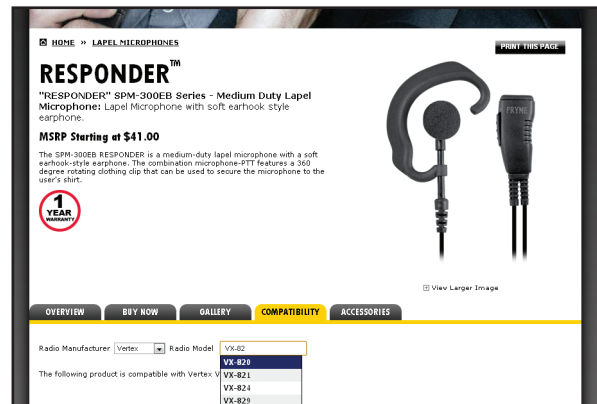

The Manufacturer Suggested Retail Price (MSRP) is shown on each product series page in the catalog. This price is typically shown as a range. For example, on page 37 the MSRP of the Responder SPM-300EB series lapel microphone is shown as \$37-64. The lower price applies to connector numbers which are shown as ONE-PIN or TWO-PIN on the connector chart. The higher price is for connectors which are listed as MULTI-PIN. So, for example a SPM-302EB (which uses an X02, SINGLE-PIN connector) would be priced at \$37 while an SPM-333EB (with a MULTI-PIN X33 connector) would be the higher \$64 price.

Typically, a multi-pin connector will cost \$30 (MSRP) more than a one or two pin model.

Ordering on PRYME.com

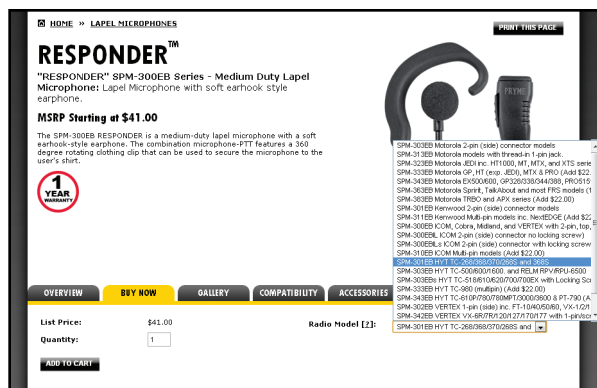

The PRYME.com website now makes it easier than ever to determine the correct model number for your PRYME accessory and to place an order. Simply open your web browser and go to PRYME.com and then browse our product section until you locate the Product Series page for the accessory you wish to order.

To determine a model number for a PRYME accessory click on the COMPATIBILITY tab at the bottom of the product series page. Select the name of radio manufacturer for the two-way radio the accessory will be used with and then type the Radio Model number in the text box.

A pop-down menu will appear showing radios with a similar model number to what you have typed. Simply select the correct model number from the list and you will be shown the model numbers of all compatible models available for that series of accessory.

You can also place an order directly on PRYME.com by using the BUY NOW tab located at the bottom of the product series page. Just chose the correct model number from the drop down box, select a quantity, and add the item(s) to your shopping cart. The correct pricing will be shown automatically.

WTX-500 SERIES WIRELESS PUSH-TO-TALK ADAPTERS FOR 2-WAY RADIOS

Auxiliary PTT switch
(also used for pairing)

QD® Accessory Jack

WTX-533 SHOWN

PTT-4100W
SWITCH INCLUDED
WITH WTX MODELS

Convenient adjustable Velcro® can be used on handlebars, steering wheels, gearshifts, etc.

PRYME ADAPTERS WITH QD® JACK CAN USE ANY OF OUR X05 ACCESSORIES INCLUDING:

SPM-2105
Heavy Duty Speaker Mic
\$65

SPM-1405
Medium Duty Boom Mic Headset
\$70

SPM-1505
Heavy Duty Throat Mic
\$104

SPM-2305
Medium Duty 2-Wire Lapel Mic
\$77

Quick Disconnect accessories are sold separately. For a full list of QD products, see pages 54-55.

FEATURES

- Quick Disconnect jack allows the adapter to be used in conjunction with any PRYME QD audio accessory that is not "listen-only"
- The wireless receiver in the WTX-500 series adapter enables you to activate the Push-to-Talk (PTT) function of your two-way radio wirelessly
- Includes PRYME PTT-4100W wireless PTT transmitter which can be held in your hand or fastened to your clothing or duty gear using the Velcro fastener*
- When using the wireless PTT, transmit audio is picked up by the microphone in the attached Quick Disconnect accessory
- The wireless receiver in the WTX-500 series adapter is powered by the two-way radio - the PTT-4100W transmitter is powered by a single (included) replaceable coin-cell battery which provides hundreds of hours of operation
- See pages 54-55 for a full list of Quick Disconnect accessories.

Velcro® is a registered trademark of Velcro Industries and is often used to describe hook and loop fasteners.

PRYMEBLU[®] BT-500 SERIES WIRELESS BLUETOOTH ADAPTERS FOR 2-WAY RADIOS

FEATURES

- Allows you to use a wireless Bluetooth headset with your two-way radio in place of a speaker microphone or wired audio accessory.
- Compatible with thousands of readily available Bluetooth headsets and other audio accessories. (Bluetooth headset not included.)
- Easy pairing process. Remembers paired connection to the wireless headset even if powered off or removed from the 2-way radio.
- Several Push-To-Talk options: use the PTT button on the PRYMEBLU adapter to initiate transmissions, use the optional PRYMEBLU wireless Push-to-Talk (see page 12), or use an optional PRYME QuickDisconnect wired audio accessory such as the PTT-5. (Optional accessories are sold separately.)
- Most (multi-pin connector) models are powered by the radio and do not require any batteries or charging. Simple pin models have an internal Li-Ion battery pack and must be recharged between uses.
- Enhance with optional wired PRYME QuickDisconnect earphone or audio accessory for additional privacy. (Optional accessories are sold separately.)
- Patented "Smart Switch" feature automatically routes RX and TX audio to the appropriate wireless or wired audio accessory depending on what accessories are connected to the PRYMEBLU Adapter. When no audio accessories are connected, audio is routed to the radio's internal speaker and microphone. Smart Switch feature not available on the BT-583 model.)
- Status LED indicates connection to a compatible wireless accessory.

PRYMEBLU[®] WIRELESS BLUETOOTH ACCESSORIES FOR 2-WAY RADIOS

BT-PTT Wireless Bluetooth PTT

The PRYMEBLU[®] PTT allows you activate your radio's Push-To-Talk function wirelessly, when using a PRYMEBLU[®] Adapter and paired Bluetooth headset. The BT-PTT can be held in the hand, worn on a lanyard, or secured to just about anywhere using the Velcro[®] fastener! Easily attaches to your duty gear, automobile steering wheel, or any convenient location! This product requires a PRYMEBLU[®] Adapter (sold separately) and a paired wireless Bluetooth headset (not included.)

Compatible with all PRYMEBLU[®] adapters (including models for both portable and mobile radios.)

PRICE REDUCTION. NOW ONLY \$99.99 (MSRP) Was \$159.95

FEATURES

- Allows you to activate the two-way radio's Push-to-Talk function wirelessly
 - Pairs quickly and easily with any PRYMEBLU[®] Adapter
 - Remembers the paired connection even if the PTT, wireless headset, or two-way radio is powered off. Automatically re-connects the wireless connection the next time the PTT and PRYMEBLU[®] Adapter are turned on
 - Multi-function LED keeps the user updated on the BT-PTT's status
 - Internal Li-Ion battery pack powers the BT-PTT up to 12 hours on a single charge (Charger included)
 - Can be held in the hand, worn on a lanyard, or secured almost anywhere using the built-in Velcro[®] Fastener
 - Requires a PRYMEBLU[®] Wireless Bluetooth Adapter (sold separately) and Bluetooth headset (not included)
- Velcro[®] is a registered trademark of Velcro Industries and is often used to describe hook and loop fasteners.

BT-MOBILE - HANDSFREE KIT Bluetooth Adapter for Mobile Two-Way Radios

The PRYMEBLU[®] BT-MOBILE Adapter allows you to use a compatible wireless Bluetooth headset or other audio accessory with a MOBILE two-way radio. The Adapter plugs into and gets its power from any automobile cigarette-lighter style outlet. The adapter's replaceable interface cable plugs directly into the microphone jack of your mobile two-way radio. The BT-MOBILE works with thousands of off-the-shelf consumer Bluetooth headsets (not included).

FEATURES

- Allows you to use a Bluetooth headset to transmit over your mobile 2-way radio (receive audio is heard over the mobile radio's speaker)
- Compatible with thousands of readily available Bluetooth headsets (not included)
- Easy pairing process. Stores paired connection to the wireless headset even if the Radio is powered off or adapter is removed from the 2-way radio
- No time delay on Transmit Audio messages
- Powered by the automobile using a Car Power Plug
- Compatible with a wide range of different mobile radios Simply chose the correct model adapter for your radio

Optional BT-PTT Wireless Push-to-Talk

\$99.99

Radio connector plugs into your mobile radio's front panel microphone jack.

Multifunction Pairing / PTT Switch
Activate your radio's transmit function using the included BT-PTT wireless Push-to-Talk or using the multifunction button on the front of the adapter.

\$15.95

Optional PTT-FS1 - Foot switch PTT
*Requires modification of adapter

HDS-BT BLUETOOTH DUAL EARMUFF HEADSET

NEW FOR 2012!

Coming July 2012

1 YEAR WARRANTY

MSRP \$399 Includes battery and charger

*Approximate Range:
10 meters*

LED indicates link and battery status

Volume Control Button and Cable Jack

Optional Radio Interface Cable sold separately Page 31

Adjustable Metal Boom-Arm

HDS-BT-EMB (Flat Black)

Comfortable Foam Ear Pads.

Over-the-Head Adjustable Velcro® Strap

Tactile Wireless Push-to-Talk Button

Behind-the-Head Stainless Steel Band

Listen Only Jack allows the user to listen to a scanner or MP3 player while still monitoring radio transmissions

Noise-Canceling Dynamic Mic Element

Also works with most cell phones!

Available in either flat black or carbon-fiber finishes

HDS-BT-EMC (Carbon Fiber)

PRICES - HEADSET ONLY
(Optional Cables available on page 31)

MODEL #	DESCRIPTION	PRICE (less cable)
HDS-BT-EMB	Dual Earmuff with boom mic in flat black	\$399
HDS-BT-EMC	Dual Earmuff with boom mic in flat black	\$399

PRYME's popular dual earmuff headset is now available in a wireless Bluetooth version. The HDS-BT uses the same design as our other HDS muff headsets but can connect wirelessly with a Bluetooth enabled cellular phone or a PRYMEBLU Adapter (sold separately) for two-way radio use.

FEATURES

- The same dual muff headset design as our popular wired models – now available in wireless Bluetooth
- Connects to any Bluetooth capable cellular phone or to a PRYMEBLU Adapter for two-way radio use (PRYMEBLU Adapter sold separately)
- Push-to-Talk button on left muff allows you to activate PTT wirelessly (when used with a PRYMEBLU Adapter)
- Noise canceling dynamic microphone element for clear audio even in noisy environments
- Dual muff earphones - seal out ambient sound so you can hear incoming transmissions
- ON/OFF – volume control knob on headset
- Internal lithium-ion (Li-Ion) rechargeable battery for up to 12 hours of operation between charges
- Comfortable behind-the-head band design allows the headset to be worn for hours - the over-the-head Velcro® strap holds the headset in place
- Fully adjustable chrome-plated boom
- Available in flat black (HDS-BT-EMB) and carbon fiber (HDS-BT-EMC) finishes
- Wired jack allows headset to be connected to a two-way radio without using Bluetooth (Cable sold separately. See page 31)

* Velcro® is a registered trademark of Velcro Industries and is often used to describe hook and loop fasteners.

GPSMIC SYSTEM INFORMATION

GPSMIC SYSTEM FEATURES

- Integrates into your existing voice channels; no additional data channel or system backbone is required. Provides location reporting across the coverage area of your existing radio system.
- Automatic location reports are sent only when the microphone detects a clear channel is available. This helps minimize collisions with other traffic.
- Highly customizable to meet the unique needs of your organization. Most operating parameters are programmable using the PRYME GPSMIC Tools software suite. Extensive over-the-air, on-the-fly capabilities maximize flexibility.
- Any GPSMIC or GPSMIC BOX can be used as a single-channel base station. For larger networks, a PRYME Base Station Unit (BSU) can receive location reports from up to four radio channels. Additional Base Station Units can be stacked for additional channel capacity.
- Our simple Application Programming Interface (API) allows the GPSMIC system to be integrated into third-party mapping and dispatch software packages.

BASE STATION

Any GPSMIC or GPSMIC Box can be installed as a single-channel base station. A rack-mounted Base Station Unit is available for multiple channel installations. A PC running GPSMIC Tools: CheckPoint is attached to the Base Station GPSMIC to view maps showing live location reports.

COMMAND - A GPSMIC or GPSMIC BOX in the field can be connected to a laptop computer to view maps and use other base station functions.

MOBILE
A GPSMIC BOX installed in a vehicle. Sends location reports according to pre-programmed settings.

PORTABLE
A portable radio with a GPSMIC attached. Sends location reports according to pre-programmed settings.

GPSMIC SOFTWARE (Compatible with GPS-5100, GPS-4100P and GPS-4100M)

The PRYME GPSMIC Tools software suite is used to program and manage the GPSMIC units on your two-way radio system. GPSMIC Tools contains two different software applications that make managing your GPSMICs easy: GPSMIC Configurator and GPSMIC CheckPoint. CheckPoint™ is a fleet management program that is used to track and administer GPSMICs that are in the field. Configurator is used to program and customize GPSMICs before they are deployed into the field.

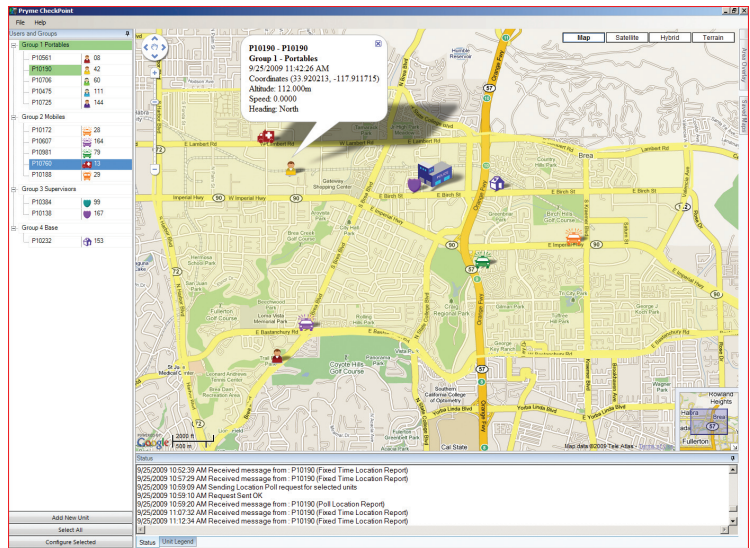

GPSMIC Tools: CheckPoint FEATURES

- Track and view location reports received from GPSMIC units operating on your radio system using map information provided by Google Maps
- Maps can be easily switched between map, satellite, hybrid and terrain views
- Easy polling of unit locations: just double-click on the Unit ID of the GPSMIC you wish to poll
- You can assign a unique icon to each GPSMIC unit shown on the map. Nearly 200 different icons are included with the software and you can even import your own customer icons
- Reprogram GPSMIC units over-the-air. Most settings can be changed this way when operational requirements call for it
- Receive and manage panic alarm reports from GPSMICs in the field
- View historical location data for all users and groups. Import saved historical information and export histories to NMEA, KML or GPX formats for viewing in other programs.
- Aliasing feature allows you to assign descriptive names to GPSMIC units and groups and change them on the fly
- Visual overlay feature allows the user to draw on map areas as a reference
- Places of Interest can be added to the map, showing designated command centers, incident locations, or other areas of note

GPSMIC Tools: Configurator FEATURES

- Read settings currently programmed into a GPSMIC
- Write new updated settings to GPSMICs
- Set the Unit ID and group number of a GPSMIC
- Set the radio profile for the GPSMIC including the ability to load existing and create new radio profiles
- Manage the parameters of all GPSMIC features including reporting modes, panic alarm, and more
- Manage the GPSMIC's internal memory feature; including downloading and saving reports or clearing the unit's recorded memory so it can save new reports
- Save and load operating behavior templates
- Download, archive, and clear reports saved to the GPSMIC's internal memory

Tracking GPSMICs with PRYME's CheckPoint™ Software

GPS-4100P SERIES GPS MICROPHONE FOR PORTABLE RADIOS

The GPS-4100P Series is the next generation of PRYME's patented GPSMIC location reporting device for portable radios. The GPSMIC operates as a normal remote speaker microphone attached to a two-way radio but also contains a GPS receiver and FSK modem. The GPSMIC sends data reports over the voice radio channel which allow the dispatch operator to know the current location of each GPSMIC unit.

Because GPSMICs integrate into your existing voice radio system; they do not require any additional channels or licensing and there is **NO MONTHLY FEE** involved to deliver **REAL TIME GPS TRACKING** with no hassle. The unit works with both conventional and trunked analog radio systems.

MSRP \$535-\$555

OPTIONAL ACCESSORIES for the 3.5mm Jack

EH-1225SC-41 D-LOOP - \$26

EH-1325SC-41 CLEAR TUBE - \$33

EH-325SC-41 SOFT EARHOOK - \$21

For a list of all accessories, visit www.pryme.com

PATENTED - Over 27 US and International Patents (and patents pending)

FEATURES

- Functions as both a remote speaker microphone and a highly-configurable GPS location device
- Works with virtually any portable two-way radio including conventional and trunked. Helps keep track of assets down to the level of the individual radio operator
- Integrates into your existing non-compressed voice radio system; does not require a dedicated data channel. Location reports are sent as short audible data bursts at programmed instances
- The GPSMIC is capable of reporting the location of the user based on several different criteria. Reporting modes can be combined to customize the system. Different GPSMIC units can use different reporting options
 - Polling: Reports the location of the GPSMIC when requested by the base station dispatch operator
 - Push-To-Talk: Reports location of the GPSMIC whenever the user presses the PTT key to send a voice transmission
 - Elapsed Time: Automatically sends a location report after a programmed amount of time has passed
 - Relative Distance: Sends a location report after the unit has moved a predetermined distance away from its last reported location
 - Fixed Distance (Geofence): Sends a location report and alert whenever a user moves outside of a programmed perimeter
- Mute function turns the internal speaker off while data reports from other GPSMICs are received, reducing the amount of data heard by voice users
- Base-Enabled feature allows GPSMICs to view location reports graphically when connected to a PC running mapping software, such as GPSMIC Tools: CheckPoint (see page 14)
- Professional quality, water resistant construction for long life under heavy use
- Compatible with other GPSMIC System devices, including the original PRYME GPS-5100 series GPSMIC and the GPS-4100M AVL Box

GPS-511-NX ADAPTER FOR FleetSync™ and NEXEDGE®.

IN STOCK!

MSRP \$125.95

Same data format as Kenwood GPS Mics. Can be used with any mapping or tracking software system that supports Kenwood GPS Mics. NOT compatible with PRYME CheckPoint® software.

The GPS-511-NX adapter is perfect for agencies using Kenwood multi-pin radios that wish to send the radio user's geographic location data over their radio system using the FleetSync™ or NEXEDGE® protocols. The adapter attaches to the radio via the Universal Device Connector port on the side and secures with a simple thumbscrew. Once connected to the radio, the GPS receiver in the GPS-511-NX is powered by the radio and active whenever the radio is turned on. The GPS adapter constantly feeds the user's GPS coordinates and other data to the radio in standard NMEA format so that the information can be sent over-the-air using FleetSync™. The low profile and affordable cost of the adapter make it a smart alternative to a GPS microphone.

FEATURES

- Compatible with FleetSync™ or NEXEDGE® capable radios that have a multi-pin Universal Device Connector, such as the NEXEDGE® NX-200/300, Kenwood TK-5210/5310/5410, and TK-5220/5320.
- Contains a high-sensitivity GPS Receiver that can accurately measure the radio's location within 10 meters, altitude within 50 meters, velocity and heading*.
- Determines location typically in less than 30 seconds from power on (cold start) under open sky conditions.
- The adapter is powered directly by the radio. It requires no recharging.
- Bright status LED indicates operation.
- Does not affect operation of the radio's internal speaker and microphone.
- **NOTE:** Receiving location reports over-the-air requires a properly programmed FleetSync™ or NEXEDGE® compatible radio at the base station location and a computer running GIS/CAD software (not included).

* GPS location data is acquired from government satellites. Accuracy of this data is subject to obstructions, reflections, interference, and government interventions. Users should avoid placing absolute reliance on coordinates obtained from any GPS receiving device. In practice, accuracy is variable and is affected by many environmental factors such as interference and obstruction. Altitude is especially subject to inaccuracies. Ultimately, the reliability of the data is under the control of the GPS source, not the GPS receive system

GPS FOR MOBILE RADIOS

\$540* PRICE REDUCTION

*BOX ONLY - RADIO INTERFACE CABLE NOT INCLUDED
SEE PAGE 19 FOR RADIO CABLES.

Radio Cable Connector
(Radio Cable Not Included)

Status LED Alerts the User to GPS Status

Mini USB Jack For PC Connection and Programming
(CABLE NOT INCLUDED)

Antenna Connector For GPS Patch Antenna
(Antenna Included)

Internal GPS, Modem, 1,300 Location Memory and GPS Antenna

ALSO MAKES A GREAT SMALL NETWORK BASE STATION

PATENTED - Over 27 US and International Patents (and patents pending)

FEATURES

- The PRYME GPS-4100M GPSBOX adds over-the-air GPS location reporting features to a mobile or fixed (base) station two-way radio. The GPSBOX is compatible with the PRYME GPSMIC system
- Works with virtually any mobile two-way radio including conventional and trunked
- Integrates into your existing non-compressed voice radio system; does not require a dedicated data channel Location reports are sent as short audible data bursts at the end of the user's voice transmissions
- Internal GPS receiver - SMA style jack allows connection of an external GPS patch antenna (included) GPS location data is typically accurate to within 10 meters
- Onboard memory in each GPSBOX can record and store up to 1,300 location reports, equivalent to over 100 hours of location history assuming one location report per five minute period
- Allows the radio operator to use the mobile radio's standard microphone
- Radio Cable layout varied by radio model - The GPSBOX connects to most two-way radios using only the radio's accessory jack - Some radio models require connection to a combination of the accessory jack, microphone jack, and/or external speaker jack
- Integrated mini-USB jack allows the connection of a computer interface cable
- Base-Enabled feature allows GPSBOX users to view location reports graphically when the unit is connected to a PC running PRYME GPSMIC Tools software
- The GPSBOX as the same configurable reporting options as the GPS-4100P GPSMIC: PTT, Elapsed Time, Relative Distance, Fixed Distance, and Location Polling by the base station are all available

Single Channel Base Station Operation

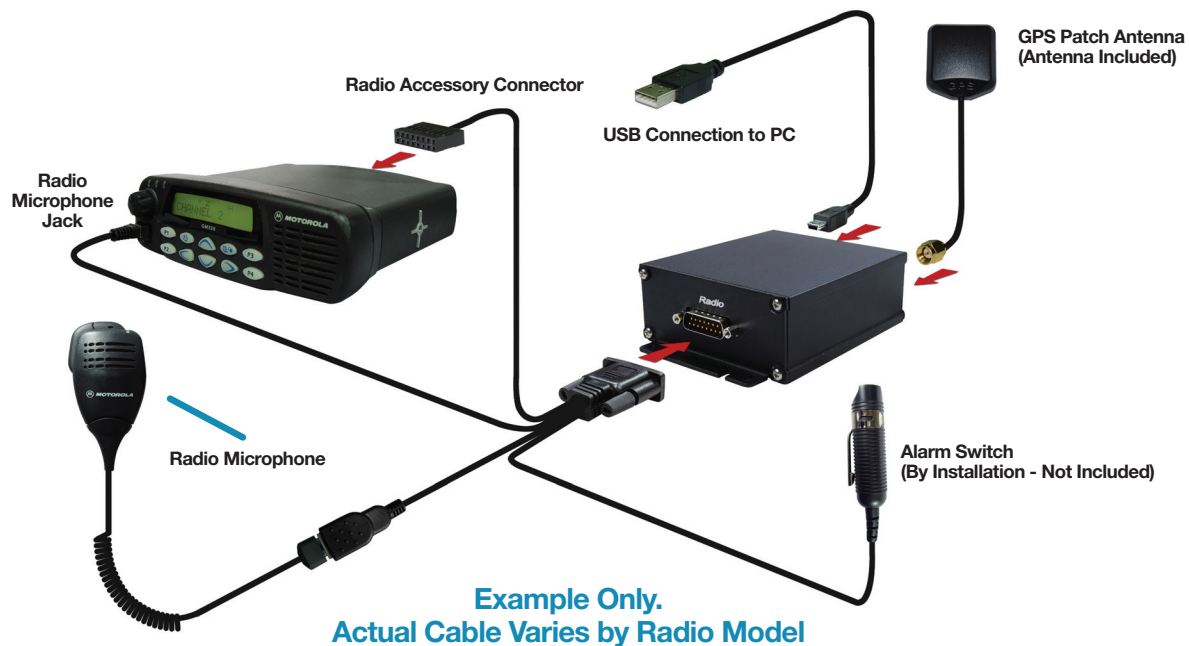

The GPS-4100M can be used as a single channel GPSMIC Base Station by connecting the unit to a personal computer running the PRYME GPSMIC Tools software suite. This enables location reports received over the radio system to be displayed within the GPSMIC Tools: CheckPoint mapping application or in another computer aided dispatch application which supports the GPSMIC System. The GPS-4100M can be used as a base station in both fixed station and mobile command station installations.

PRYME® SPEAKER MICROPHONES

SPEAKER MICROPHONE SELECTOR GUIDE

PRYME remote speaker microphones are the first choice for anyone who wants simple communications, including many public safety and private security officers. The microphone is typically worn on the user's shoulder. Received calls are easy to hear, because the loud, front-firing speaker of the RSM is conveniently placed near your ears, not on your belt like the internal speaker of the two-way radio. For times when you need privacy, each RSM has a jack for an optional earphone.

SELECTOR GUIDE FOR SPEAKER MICROPHONES

SILHOUETTE™

Designed with retail, hospitality, and healthcare users in mind, our SMC-1LW SILHOUETTE™ is our smallest, lightest speaker microphone yet. The SILHOUETTE™ is as discrete and unobtrusive as it is easy to use. Despite its small size, the front-firing high-output speaker is just as loud and easy to hear as a speaker microphone twice the size.

FEATURES

- Small, lightweight and easy to use. Measures only 2.8" x 1.9" x 0.85" (1.4" clip) (H/W/D) and weighs 2.6 oz.
- Adjustable, rotating clip secures the microphone gently to the user's clothing
- Loud front-firing speaker matches the audio output of much larger speaker mics
- Tactile Push-To-Talk button for sending radio calls
- Microphone allows user's voice to be heard clearly
- Features a 3.5mm accessory jack for connecting an earphone to the unit (See EH-300, EH-1300, EH-1200 Series for Listen Only Earpieces pages 34-35)

HIGH NOISE SELECTOR GUIDE

For industrial factory workers, tactical teams, racing crews, or any user that operates in a high-noise environment, PRYME offers a variety of products that block background noise so that your voice can be transmitted intelligibly. Our transducer-based microphone design picks up voice audio by sensing vibrations through the user's skin, not through the air like a traditional microphone. This allows the microphone to pick up the sound of the user's voice while rejecting most of the background noise, allowing you to be heard.

SELECTOR GUIDE FOR HIGH NOISE ACCESSORIES

<p>Gladiator™ SPM-1500 Series</p> <p>Recommended for Motorsports, Public Safety, and Industrial</p> <p>MSRP \$90–\$110</p> 	 <p>THROAT MIC</p>	<ul style="list-style-type: none"> • Tactical, heavy-duty throat microphone with acoustic earphone • Blocks background noise by picking up the sound of the user's voice directly from vocal chord vibration • New single piece microphone for comfort with performance • Heavy-duty construction, featuring polyurethane cable, rubber, and high-impact polycarbonate • Clear acoustic tube style surveillance earphone made of heavy grade surgical tubing • Large PTT button for tactical set-up • Fits neck sizes from 12" to 17"
<p>SPM-1600 Series</p> <p>Recommended for Public Safety and Industrial</p> <p>MSRP \$130–\$150</p> 	 <p>BONE CONDUCTION HEADSET</p>	<ul style="list-style-type: none"> • Dual-Bone Conduction temple microphone reduces background noise by picking up transmit audio directly from vibrations below the user's skin • Adjustable wrap-around style headset secures behind the user's head • Uses PRYME's upgradable tactical PTT • Ambient receive speakers leave the user's ears uncovered so that the user can hear both incoming radio transmissions and the sounds going on around them
<p>SPM-1700 Series</p> <p>Recommended for Construction and Manufacturing</p> <p>MSRP \$85–\$105</p> 	 <p>SKULL MIC</p>	<ul style="list-style-type: none"> • Easily and quickly installs into most hardhats or helmets with plastic liners • Heavy-duty construction, featuring polyurethane cable, rubber, and high-impact polycarbonate • Picks up the voice audio directly from vibrations in the user's skull, making it very resistant to picking up background noise • Large, ambient receive ear speaker leaves the user's ears uncovered so that they can hear what is going on around them • Uses PRYME's compact TACTICAL TOUCH Push-To-Talk (PTT) for easy activation - The PTT can be interchanged with several optional styles of PTT (Optional PTTs sold separately.)

SPM-1600 SERIES BONE CONDUCTION HEADSET

PRICING

CONNECTOR	MSRP
Simple Pin (1 & 2 pin)	\$130
Simple Pin w/screw(s)	\$135
Multi Pin	\$150

The SPM-1600 wrap-around headset features a mic element that rests against the user's temple.

The microphones pick up and transmit audio directly from vibrations below the user's skin, using advanced bone conduction technology. Since the dual ambient ear speakers do not block the user's ears, the SPM-1600 allows the user to hear both incoming radio calls and what is going on around them.

FEATURES

- Dual-Bone Conduction temple microphone reduces background noise by picking up and transmitting audio directly from vibrations below the user's skin
- Adjustable wrap-around style headset secures behind the user's head
- Uses PRYME's upgradable tactical PTT
- Ambient receive speakers leave the user's ears uncovered so that the user can hear both incoming radio transmissions and the sounds going on around them

Simple Pin (1 & 2 pin)	\$85
Simple Pin w/screw(s)	\$85
Multi Pin	\$105

Our lightweight in-helmet communications system mounts without tools to the helmet liner using a unique strap fastener system. The ear speaker provides ambient sound and allows the user to hear incoming radio communications without blocking their ability to hear what is going on around them. Voice transmissions are picked up by a noise-resistant microphone which sense sound vibrations through the user's skull.

FEATURES

- Easily and quickly installs into most hardhats or helmets with plastic liners
- Heavy-duty construction, featuring polyurethane cable, rubber, and high-impact polycarbonate
- Picks up the voice audio directly from vibrations in the user's skull, making it very resistant to picking up background noise
- Large, ambient receive ear speaker leaves the user's ears uncovered so that they can hear what is going on around them
- Uses PRYME's compact TACTICAL TOUCH Push-To-Talk (PTT) for easy activation - The PTT can be interchanged with several optional styles of PTT (Optional PTTs sold separately.)

HDS-EM DUAL EARMUFF HEADSET

MSRP \$199 + cable

Depending on connector; see pages 64-70

PRICES - HEADSET ONLY (Radio Cable Not Included. See page 31)

MODEL #	DESCRIPTION	PRICE (less cable)
HDS-EMB	Dual Earmuff with boom mic in flat black	\$199
HDS-EMC	Dual Earmuff with boom mic in carbon fiber	\$199

The HDS-EM is a professional grade dual-muff headset perfect for racing intercom, avionics, and industrial use. The rubber-covered, behind-the-head band and adjustable Velcro head strap are comfortable and keep the headset in place. Receive audio is heard over loud dual-muff earphones and the noise-canceling dynamic boom microphone ensures clear audio on transmit. The HDS-EM is lightweight, comfortable and easy to adjust to fit any user.

FEATURES

- Dual muff style headset with adjustable behind-the-head stainless steel band and over-the-head adjustable Velcro® strap
- Lightweight, comfortable, and easy to adjust
- Aviation-style boom microphone with adjustable arm
- Noise-canceling dynamic microphone element reduces transmitted background noise
- Tactile PTT button mounted in the left earphone
- Loud muff earphones allow the user to hear incoming signals easily
- 3.5mm Audio input jack allows a second audio device (such as a scanner or MP3 player) to be heard over the earphones
- Removable and replaceable radio interface cable
- Available in flat black or carbon-fiber finishes

PRYME[®] 2-WIRE ACCESSORIES

2-WIRE ACCESSORIES SELECTOR GUIDE

PRYME two-wire audio accessory kits contain an earphone and an integrated microphone/Push-to-Talk. The microphone/PTT can either be clipped to the user's collar and used as a lapel microphone or can be hidden under the user's clothing under the sleeve of a shirt or jacket, and held in the hand. Because the kit can be worn in two different ways, our 2-wire audio accessories are most versatile and work well in just about any application.

SELECTOR GUIDE FOR 2-WIRE ACCESSORIES

<p>Responder™ SPM-300EB Series</p> <p>Recommended for Healthcare, Hospitality and Retail</p> <p>MSRP \$35-\$55</p> <p>1 YEAR WARRANTY</p>		<ul style="list-style-type: none"> • Low profile, rugged lapel mic and in-line earphone • Soft earhook holds earphone in place during strenuous activity and is extremely comfortable to wear • High quality speaker and mic elements that allow for clear audio on both transmit and receive • Rugged, polycarbonate housing for maximum durability • Polyurethane-jacketed, coiled mic cable • Conveniently located Push-To-Talk button for easy use

HEADSETS SELECTOR GUIDE

Headsets are a convenient way to use your two-way radio, since the microphone and earphone are always exactly where you need them to be. PRYME headsets are also extremely comfortable, so they can be comfortably worn for long periods of time. We offer headsets in several different configurations, such as over-the-ear and behind-the-head so that you can choose the right one for you.

SELECTOR GUIDE FOR HEADSETS

<p>HDS-BT Series </p> <p>COMING IN JULY 2012</p> <p>WIRELESS</p> <p>Recommended for Racing, Sports, Manufacturing, Industrial</p> <p>MSRP \$399 </p>		<ul style="list-style-type: none"> • The same dual muff headset design as our popular wired models – now available in wireless Bluetooth • Connects to any Bluetooth capable cellular phone or to a PRYMEBLU Adapter for two-way radio use (PRYMEBLU Adapter sold separately) • Push-to-Talk button on left muff allows you to activate PTT wirelessly (when used with a PRYMEBLU Adapter) • Noise canceling dynamic microphone element for clear audio even in noisy environments • Dual muff earphones - seal out ambient sound so you can hear incoming transmissions • ON/OFF – volume control knob • Internal lithium-ion (Li-Ion) rechargeable battery for up to 12 hours of operation between charges • Comfortable behind-the-head band design allows the headset to be worn for hours - the over-the-head Velcro® strap holds the headset in place • Fully adjustable chrome-plated boom • Available in flat black (HDS-BT-EMB) and carbon fiber (HDS-BT-EMC) finishes • Wired jack allows headset to be connected to a two-way radio without using Bluetooth (Cable sold separately)
<p>HDS-EM Series</p> <p>Recommended for Racing, Sports, Manufacturing, Industrial</p> <p>MSRP \$199+Cable </p>		<ul style="list-style-type: none"> • Dual muff style headset with adjustable behind-the-head stainless steel band and over-the-head adjustable Velcro® strap • Lightweight, comfortable, and easy to adjust • Aviation-style boom microphone with adjustable arm • Noise-canceling dynamic microphone element reduces transmitted background noise • Tactile PTT button mounted in the left earphone • Loud muff earphones allow the user to hear incoming signals easily • 3.5mm Audio input jack allows a second audio device (such as a scanner or MP3 player) to be heard over the earphones • Removable and replaceable radio interface cable • Available in flat black or carbon-fiber finishes
<p>Patriot™ SPM-1400 Series</p> <p>Recommended for Hospitality and Retail</p> <p>MSRP \$40–\$60 </p>		<ul style="list-style-type: none"> • Rugged, medium duty behind-the-head headset with flexible boom microphone • Adjustable, padded headset allows for ideal fit and maximum comfort for long hours of use • Noise canceling boom mic • Rugged polycarbonate PTT housing for maximum durability • High-quality speaker allows for ideal receive audio • Remote PTT allows for multiple uses in the field • Reinforced strain relief gives unit maximum durability
<p>Highway™ SPM-800 Series</p> <p>Recommended for Open or Closed Face Motorcycle Helmets</p> <p>MSRP \$63 </p>		<ul style="list-style-type: none"> • Medium duty, in-helmet motorcycle mic system • Powerful in-helmet speakers allow the user to hear radio transmissions over road noise • High-quality electret condenser element produces excellent transmit audio • Handlebar mountable Push-To-Talk switch for convenient communications • Installs into helmet using only two-sided fastening tape. No drilling of holes is required • Modular features allow the mic system to be easily disconnected from the motorcycle • Available for both open faced (SPM-800B) and full faced (SPM-800F) helmets

HDS-BT-EMC (Carbon Fiber)

PRICES - HEADSET ONLY
(Optional Cables available on page 31)

MODEL #	DESCRIPTION	PRICE (less cable)
HDS-BT-EMB	Dual Earmuff with boom mic in flat black	\$399
HDS-BT-EMC	Dual Earmuff with boom mic in flat black	\$399

PRYME's popular dual earmuff headset is now available in a wireless Bluetooth version. The HDS-BT uses the same design as our other HDS muff headsets but can connect wirelessly with a Bluetooth enabled cellular phone or a PRYMEBLU Adapter (sold separately) for two-way radio use.

FEATURES

- The same dual muff headset design as our popular wired models – now available in wireless Bluetooth
- Connects to any Bluetooth capable cellular phone or to a PRYMEBLU Adapter for two-way radio use (PRYMEBLU Adapter sold separately)
- Push-to-Talk button on left muff allows you to activate PTT wirelessly (when used with a PRYMEBLU Adapter)
- Noise canceling dynamic microphone element for clear audio even in noisy environments
- Dual muff earphones - seal out ambient sound so you can hear incoming transmissions
- ON/OFF – volume control knob on headset
- Internal lithium-ion (Li-Ion) rechargeable battery for up to 12 hours of operation between charges
- Comfortable behind-the-head band design allows the headset to be worn for hours - the over-the-head Velcro® strap holds the headset in place
- Fully adjustable chrome-plated boom
- Available in flat black (HDS-BT-EMB) and carbon fiber (HDS-BT-EMC) finishes
- Wired jack allows headset to be connected to a two-way radio without using Bluetooth (Cable sold separately. See page 31)

* Velcro® is a registered trademark of Velcro Industries and is often used to describe hook and loop fasteners.

PRYME® HEADSETS

HDS-EM DUAL EARMUFF HEADSET

MSRP \$199 + cable

Depending on connector; see pages 64-70

PRICES - HEADSET ONLY (Radio Cable Not Included. See page 31)

MODEL #	DESCRIPTION	PRICE (less cable)
HDS-EMB	Dual Earmuff with boom mic in flat black	\$199
HDS-EMC	Dual Earmuff with boom mic in carbon fiber	\$199

The HDS-EM is a professional grade dual-muff headset perfect for racing intercom, avionics, and industrial use. The rubber-covered, behind-the-head band and adjustable Velcro® head strap are comfortable and keep the headset in place. Receive audio is heard over loud dual-muff earphones and the noise-canceling dynamic boom microphone ensures clear audio on transmit. The HDS-EM is lightweight, comfortable and easy to adjust to fit any user.

FEATURES

- Dual muff style headset with adjustable behind-the-head stainless steel band and over-the-head adjustable Velcro® strap
- Lightweight, comfortable, and easy to adjust
- Aviation-style boom microphone with adjustable arm
- Noise-canceling dynamic microphone element reduces transmitted background noise
- Tactile PTT button mounted in the left earphone
- Loud muff earphones the user to hear incoming signals easily
- 3.5mm Audio input jack allows a second audio device (such as a scanner or MP3 player) to be heard over the earphones
- Removable and replaceable radio interface cable
- Available in flat black or carbon-fiber finishes

See pages 64-70 for connector images.

FEATURES

- Medium duty, in-helmet motorcycle mic system
- Powerful in-helmet speakers allow the user to hear radio transmissions over road noise
- High-quality electret condenser element produces excellent transmit audio
- Handlebar mountable Push-To-Talk switch for convenient communications
- Installs into helmet using only two-sided fastening tape. No drilling of holes is required
- Modular features allow the mic system to be easily disconnected from the motorcycle
- Available for both open faced (SPM-800B) and full faced (SPM-800F) helmets

QD[™] QUICK DISCONNECT

PRYME's QuickDisconnect audio accessories and adapters provide both security and usability. Just install the adapter onto the radio and then plug the QD accessory into the six-pin QD connector. The push-pull mechanism locks the accessory in place during use, but still allows you to quickly remove it from the radio without tools if you need to.

Quick Disconnect Feature

UPGRADED for 2012

Our new QD connectors are now die-cast and precision machined for superb fit and incredible durability rivaling the OEM models.

Pick an Adapter and Accessory to make a set.

The PRYME Quick Disconnect (QD[™]) is available for a wide range of radios, offering additional convenience and simplicity. The PRYME QD[™] will allow the user to easily connect and disconnect a PRYME audio accessory, yet is secure enough to be used in most situations. All PRYME Quick Disconnect accessories are interchangeable with all PRYME Quick Disconnect Adapters and Pigtails, making communications convenient for large businesses that use multiple brand radios. The PRYME Quick Disconnect pigtails and adapters also prevent wear and tear, prolonging the life of your radios.

The PRYME Quick Disconnect feature is available on our SPM-300EB, SPM-1200, SPM-1300, SPM-1400, SPM-1500, SPM-1600, SPM-1700, SPM-2000, SPM-2100, SPM-2200, SPM-2300, SPM-3300, and SPM-4200.

Conversion Adapters for PRYME and OEM Audio Accessories

PRYME makes a wide variety of adapters which allow you to use the same audio accessory or microphone on several different models of two-way radios. Our adapters can save you money when upgrading radios, allowing you to continue to use existing audio accessories that you already have. Or, you can share the same audio accessory between two different radios.

CONNECTOR TABLE

PRYME STOCKS A WIDE RANGE OF CONNECTORS TO FIT MANY RADIO MODELS

Because PRYME has made it possible for our audio accessories to interface with so many radio models, we have many connectors at your disposal. To help clarify as to what part number should be ordered of any given accessory model, we offer you this handy guide.

For a more detailed explanation, please see pages 8-9.

1. FIND THE CONNECTOR REQUIRED FOR YOUR RADIO
2. PICK YOUR ACCESSORY TYPE
3. PLACE YOUR ORDER - EASY AS 1-2-3!

Example: Motorola GP300 Series = X03 connector SPM-2100 Trooper speaker mic for Motorola CP200 radio - **YOU ORDER:** Model SPM-2103

HOW TO ORDER

End Users and Individuals: Pryme Radio Products accepts telephone orders from end users or individuals.

If you are an end user or individual and wish to purchase a PRYME product and would like to be referred to a local dealer, e-mail PRYME at sales.service@pryme.com. Online ordering is also available at current sales price plus applicable sales tax and shipping and handling charges through www.pryme.com for customers that do not purchase from a dealer.

Pryme Sales Department is available to take orders from 7AM to 5PM Pacific Time every weekday, except holidays.

Customers in the U.S. and Canada can call 1-800-666-2654 toll free to speak with a PRYME representative. For all other customers, the number is 714-257-0300.

WARRANTY

PRYME Radio Products warrants all products against defects in materials or workmanship as follows: during the warranty period (90 days, 1 year or 2 years, depending on model, from the date of purchase), Pryme Radio Products will repair or replace a defective unit, at our option, without charge for parts or labor. The limited warranty is extended only to the original purchaser and is valid only to consumers in the United States and Canada. It does not cover damage or failure caused by or attributable to Acts of God, abuse, misuse, improper or abnormal usage, faulty installation, improper maintenance, lightning, or other incidences of excessive voltage, or any tampering or repairs by other than a PRYME authorized repair facility. It does not cover replacement of consumable parts, transportation costs, or damage in transit. This warranty will become void if the serial number or model number identification has been wholly or partially removed or erased.

Repair or replacement under the terms of this warranty does not extend the terms of this warranty. This warranty can only be modified by an officer of PRYME Radio Products, and then only in writing. Should this product prove defective in workmanship or material, the consumer's sole remedies shall be such repair or replacement as provided by the terms of this warranty. Under no circumstances shall PRYME Radio Products be liable for any loss or damage, direct, consequential, or incidental, arising out of the use of or inability to use this product. Some states do not allow limitations on how long an implied warranty lasts or the exclusions or limitations of incidental or consequential damages, so the above limitations or exclusions may not apply to you. This warranty gives you specific legal rights. You may also have other rights, which may vary, from state to state.

RETURNS

In order to return a product to PRYME you must do the following:

1. You must request a Return Merchandise Authorization by going to www.pryme.com/rma and filling out the RMA Request Form.
2. After filling out the form, you will receive an e-mail containing an RMA Number and instructions on how to ship the returned product(s) to PRYME. Ship the product(s) to PRYME.
3. If you do not receive the e-mail containing your RMA number, or if you have any questions or problems with the RMA form, please contact PRYME for assistance at 714-257-0300. A member of PRYME technical support or sale team will be happy to assist you.
4. Merchandise returned to PRYME for refund or exchange must be returned within (30) days of purchase, and must be contained in the original packaging and in condition for resale. Items returned for warranty service must be within the product's warranty period (one year from date of purchase for most products).

Returns that arrive at PRYME's corporate headquarters without RA numbers or proper documentation will be refused. Products lost in transit are not the responsibility of PRYME Radio Products.

CONTINUED

WARRANTY, RETURNS, CREDIT

CREDIT

1. Items returned to PRYME for credit must be returned within thirty (30) days of purchase and must be contained in the original packaging and in condition for resale. A fifteen percent (15%) restocking fee may be applied to all products returned to PRYME for credit. Shipping fees are not refundable under any circumstances. No refunds will be issued on products after thirty (30) days from shipping date.
2. Please insure the product for its replacement value and retain a copy of the original shipping documents. We recommend shipping products to us using UPS or another service that allows packages to be tracked en route.
3. All products returned for credit must have a valid RA number.

SHIPPING

PRYME Radio Products ships all domestic orders by UPS or US Post. International orders are shipped by Mail, DHL or FedEx. Shipping by different methods (U.S. Mail, trucking lines, etc.) is available at the customer's request. However, any shipping methods requested must provide some way of tracking the product in transit and require at least a signature as proof of delivery. PRYME Radio Products will not use a shipping method that does not provide at least these two safeguards unless the customer specifically requests it. PRYME shall not be held responsible for any product lost or damaged in transit if that product was shipped by an alternate method. The customer shall be responsible for the actual shipping charges in all cases, plus a handling fee of \$3.00 per box. Unless by special offer PRYME does not offer free shipping on orders for any reason. In special cases, drop shipping to another address other than the dealer's address can be available for an additional \$3.00 per shipment.

PLEASE NOTE

PRYME Radio Products are designed to produce a specific audio output level at maximum rated power. Modifying these devices in any way including adding or removing components and accessories may change the audio output of the device and could result in PERMANENT HEARING DAMAGE.

Many countries have regulations defining the amount of noise that an individual can be subjected to during a normal workday. Compliance is application-dependent and standards vary. It is the SOLE RESPONSIBILITY of the end user to determine applicability and compliance to local hearing protection regulations.

PRYME strongly recommends that the radio is off before installation of audio accessory. Once audio accessory is securely installed radio can be turned on. Radio volume switch is recommended to set at low position and adjusted once radio is turned on.
