CP185™

***Enhanced functionality,
dependable communication***

Administrators, educators and staff have to work as a team to maintain order and safety. Dependable, on-the-go voice communication across the entire school grounds is essential. It's yours in the compact, lightweight, easy-to-use CP185—a robust, high-quality solution for education that helps enable better coordination of school activities and a fast response to any situation.

Instant communication in education means:

- Seamless control on school grounds
- Quick coordination and response to emergencies
- Enhanced safety and security
- Reduced operational costs with increased staff efficiency
- Improved assembly and sporting event coordination
- Immediate school grounds updates
- Improved response time

Commercial Portable Two-Way Radio

Education Challenges	Two-Way Radio Solutions
Coordination of school activities.	From teachers to security to administration, CP185 radios enable school staff to easily communicate with one another to more effectively manage assemblies, sporting events and other school activities.
Ensuring safety and security.	Teachers, bus drivers, crossing guards, and coaches can take immediate action when disturbances or emergencies occur.
Growing focus on incident prevention.	School security can respond quickly to potentially dangerous or suspicious situations and efficiently monitor cross walks near school grounds.
Improving employee effectiveness.	School staff can manage school bus loading and unloading, large assemblies, cafeterias, and sporting events with ease.

HMN9013

CP185™ Accessories

Lightweight headset (HMN9013)—provides high clarity, hands-free communication in moderate noise environments common in schools.

Ultra Lightweight headset (Mag One™) (PMLN4445)—lightest-weight headset option that provides a convenient and cost-effective communication solution.

PMMN4013

Windporting Remote Speaker Microphone with 3.5 mm audio jack (PMMN4013) and Receive-Only Earpiece with Translucent Tube (RLN4941)—reduces background noise in windy conditions common at outdoor sporting events. A quick disconnect, receive-only earpiece works with the RSM to enable more discrete communications.

RLN4941

Standard Lilon battery, 1500 mAh min. (PMNN4081)—a slim, lightweight battery that provides up to 11 hours of battery life at high power between charges.

PMNN4081

NiMH battery, 1300 mAh (PMNN4082)—provides up to 10 hours of battery life at high power between charges.

Key Radio Features

Increased privacy—built-in simple voice scrambling for security.

VOX ready for hands-free communication—users can focus on the job at hand.

Quick access to programmable features—5 programmable buttons enable easy, one-touch access to up to 10 user-selected features.

Multi-channel capability—16 channels support communication among all your employees.

Long battery life—the standard Lilon battery provides up to 11 hours (5/5/90 duty cycle) of battery life at high power to meet the demands of employee work shifts. Or choose an optional high-capacity battery for even more runtime. Charge radios in less than 3 hours with the included charger.

High power—5 watt (VHF) / 4 watt (UHF)—adjustable power levels help extend battery life.

Lightweight, compact design—makes the radio easy to use and handle.

Crisp, clear audio—X-Pand™ technology and enhanced rejection of interference help ensure you get your message through clearly.
